ABOUT ME

Hello! My name is Konstantinos, a Greek software engineer from Thessaloniki specializing in web technologies and artificial intelligence. I'm a fast learner, quick at adapting, good with time management and can work under pressure.

EDUCATION

Aristotle University of Thessaloniki| 2018-2024

Computer Science Bachelors

In which i learnt how to code and the foundational science, mathematical principles, and engineering logic behind how computers and software systems operate. It equipped me with problem-solving skills to build scalable, efficient, and secure technologies.

Aristotle University of Thessaloniki| 2024-2026

Digital Media and Computational Intelligence Masters

That taught me how to create artificial intelligence models for generating, altering, and detecting in digital media.

WORK EXPERIENCE

greek-movies.com | May 2022 - August 2022

Web Dev Intern

Built two different versions of a web app to pick from, one in React Native and one in Flutter and deployed the demos to a Linux server through SSH using Apache.

PROJECTS

Bachelors Thesis Project| 2023 - 2024

Europeana Search Engine

Search Engine for the Vector Database of Europeana in JS

Personal Project| 2026

Portfolio Website

A website for my portfolio emulating old windows desktops
